Join Tek Green Policy

Green Policy

At Join Tek, we recognize the critical importance of sustainability and our responsibility as a connector and cable supplier to protect the Earth for future generations. Our commitment to being a green company is fundamental to our operations and guides every aspect of our business.

We are dedicated to reducing the environmental impact of our products and processes. This includes actively minimizing hazardous substances in our materials, implementing eco-friendly practices in our manufacturing facilities, and ensuring that our supply chain aligns with the highest environmental standards.

Reducing greenhouse gas emissions is a priority for us. We continuously strive to improve our energy efficiency and reduce waste across all stages of production, from design to delivery. By embracing sustainable practices, we aim to contribute to a cleaner, healthier planet while delivering the innovative, high-quality products our customers expect.

Our green policy is not just about compliance; it's about taking proactive steps to make a positive difference. We believe that sustainability is not just a responsibility but an opportunity to innovate and lead in a way that benefits both our business and the environment.

Join Tek is committed to being a responsible steward of the Earth, and we pledge to continue our efforts in reducing our environmental footprint while fostering a culture of sustainability within our organization and beyond.

About Join Tek

Innovation

Join Tek pioneers innovation by addressing intricate details in connector usage, enhancing functionality for assembly operators, end-users, and, most importantly, empowering designers with superior design solutions.

Rapid Service

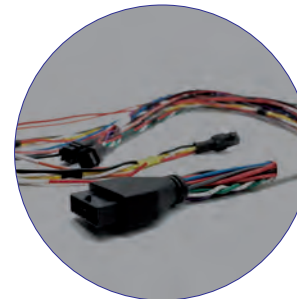

Join Tek ensures seamless service from design inception to manufacturing, delivering rapid, responsive support at every stage to meet customer needs efficiently and effectively.

Flexibility

Join Tek offers flexible solutions, providing patient prototyping, collaborative design, minimal MOQ requirements, and tailored customization to meet the unique needs of our customers.

Customized Product

Join Tek's design team collaborates closely with customers' engineering teams to deliver fully customized product designs, ensuring tailored solutions that perfectly meet specific project requirements.

Transparency

Join Tek welcomes customers to visit our facilities, observe production processes, and ensures transparency by keeping them informed throughout every stage of development and manufacturing.

Multiple Application

Join Tek's versatile connectors and wire harnesses cater to diverse applications, including automotive, LEV, medical devices, and more, delivering reliable solutions across multiple industries.

Quality

Join Tek adheres to IATF16949 automotive standards, ensuring rigorous quality control across all processes, delivering products that meet the highest industry benchmarks for safety and reliability.

Design Consultant

Join Tek offers free consultations on all aspects of connectors and wires, providing expert guidance to ensure customers make informed decisions tailored to their specific requirements.

Applications

Application

Automobile

Join Tek specializes in automotive cable assemblies, ensuring reliability, weight reduction, and space-saving designs. We meet IATF-16949 standards, offering ADAS system assembly, EMI protection, and complex harness assembly.

LEV

Join Tek offers specialized connectors and cable assemblies for Light Electric Vehicles (LEV). Our compact designs ensure efficient signal, data, and power transmission, with easy installation and user-friendly features.

Industrial

Join Tek provides robust industrial connectivity solutions, including M5, M8, and M12 screw-lock connectors. IP67-rated, these connectors are ideal for automation, robotics, sensors, and industrial panels.

Military

Join Tek (Taiwan facility) delivers MIL-SPEC cable assemblies and wire harnesses for military and aerospace. Our custom components ensure precision, durability, and mission success in extreme conditions.

Energy Storage

Battery Energy Storage Systems (BESS) revolutionize renewable energy and E-mobility, enhancing grid stability and replacing conventional power. UK policies support large-scale battery adoption, advancing sustainable

Consumer

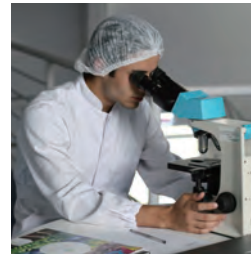

Join Tek provides high-quality I/O connectors like USB-C, FPC connectors, wire harnesses, and cable assemblies for consumer electronics, backed by 30 years of experience. nents ensure precision, durability, and mission success in extreme conditions.

Certifications

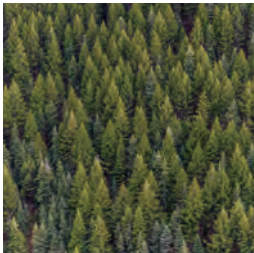

IATF-16949

IATF 16949 is a global standard for automotive quality management, ensuring product consistency, defect prevention, and continuous improvement across the automotive supply chain.

ISO-9001

ISO 9001 is an international standard for quality management systems, ensuring organizations consistently meet customer requirements and improve processes for enhanced customer satisfaction.

ISO-14001

ISO 14001 is an international standard for environmental management systems, helping organizations improve environmental performance, reduce waste, and comply with regulations sustainably.

ISO-45001

ISO 45001 is an international standard for occupational health and safety management, aimed at reducing workplace risks, ensuring safety, and improving employee well-being.
